External Home Insulation Made Easy...& Affordable

Issue No.

New increased Grants Now Available for your Home

WELCOME TO THE FOURTH EDITION OF IRELANDS HOME EXTERNAL INSULATION CATALOGUE

HELLO AND WELCOME TO THE FOURTH EDITION OF WARMLIVING.IE

My name is Noel Whelan and I'm the owner of Absolute Acrylics Ltd. We specialize in External Insulation, Attic insulation and Boiler upgrades.

Over the last 15 years working in the Insulation industry we have successfully Insulated over 4,000 houses's in the Dublin and surrounding areas. We have successfully applied and received Seai grants for all our clients.

Along the way we have met and worked with several other professionally minded Sub Contractors, General Contractors and Architects.

Dave Gaffney of DG Plumbing and Heating has been Installing New High Condensing Boilers and setting up zoned areas with Seai grant approval for Absolute Acrylics along with his own work. DG Plumbing and heating are fully registered RGI and Seai and Insured.

Kind Regards
Noel Whelan

Special Thanks to our contributors

GRANTS AVAILABLE FROM SEAI FOR ENERGY SAVING WORK ON YOUR HOME

This year Credit Unions and SEAI are teaming up to help homeowners reduce their energy bills when upgrading, Boiler, Heating controls, Windows and Insulation.

For every energy efficient loan drawn down at your credit unions reduced rate SEAI will give you a substantial grant towards the cost of the works.

How to get Grants and Funding

1. We will carry out a FREE SURVEY of your home and advise you on the best energy saving solutions.
2. Process your Grant Application with SEAI securing you substantial Grant Aid

Various Credit Unions offer reduced loan rates and you could qualify for the SEAI grant. Normal lending Terms & Conditions

apply. Loans will be subject to affordability and your Credit Union is regulated by the Central Bank of Ireland.

If you are not already a Credit Union member, joining is easy and can be done during the loan application process.

In a nutshell

You get a reduced loan rate, more grant aid, and are saved the hassle of making an application to SEAI for refunds or grants

So call Absolute Acrylics today for further details and to arrange your FREE home survey telephone: 086 365 4911

CONTRACTOR RATING

SEAI is pleased to note your good performance and trusts that this level will be maintained in the future.

Quality Assurance and Disciplinary Procedure (QADP) Scorecard and Advisory Note

The colder it is outside, the warmer it is inside

We are classified as a Green Zone First Class Contracting Company by the SEAI

What our customers have to say...

Edel and Dermot

What made you think or consider External Insulation for your home?

The house was very cold and very damp. We were losing a lot of heat through the walls as the house has not been insulated properly. We have sub floors a lot of heat was being lost through house.

Did you avail of the SEAI and Credit union 35% grant scheme?

Yes we did.

Do you feel that the SEAI and Credit Union 35% scheme was financially worth- while?

Absolutely, basically meant for us, we were able to get more work done otherwise we would not been able to afford all three - the external insulation attic and boiler up-grade done without the aid of the finance scheme from the SEAI and the Credit Union at that time.

Did you have to complete all the paper work for the Grants?

No. The Credit Union took care of all the necessary paperwork for us.

How did you hear about Absolute Acrylics Ltd?

A recommendation came from a family member.

What measures did you have installed, External Insulation, Attic Insulation, Boiler and Heating System Up-grade?

We had all three done - External Insulation, Attic and our boiler upgraded.

How do you feel the project was supervised and the overall standard of workmanship?

The job was very well organized. The workmanship was excellent. The men were very reliable. Good communication skills. Overall, we were very happy with the work and workmanship of Absolute Acrylics.

Can you feel the difference in your home?

Absolutely! We have no more dampness in the house. No more loss of heat. We can actually feel the warmth in the house. Rarely turn the heating on anymore. The draft and dampness are totally gone from the house, which was a big issue for us!

Did you receive a Guarantee?

Yes we did. We received a 10 year Guarantee from Absolute Acrylics Ltd.

Would you recommend Absolute Acrylics Ltd.?

Absolutely and if I am totally honest would not recommend any other Company to do the External Insulation.

Sandra Hanapy

What made you think or consider External Insulation for your home?

House was very cold especially the Gable wall is big. The walls were freezing cold, front, side and back of house and External Insulation was the best way forward for us.

How did you hear about Absolute Acrylics Ltd?

I had seen Absolute Acrylics' vans in the area and somebody told me that they saw house being External Insulated in Artane. I went to Artane to take a look at the house. I was very happy in what I saw and then I contacted Absolute Acrylics.

Did you have to complete any paper work for the SEAI Grants?

No, Absolute Acrylics did all the paperwork for me.

What measures did you have installed?

I had A Rated Windows installed and Patio doors front and back and the External Insulation.

How did you feel the project was supervised and the over-all standard of workmanship?

Standard of workmanship was excellent. No problems at all from start of the house until it was finished. The men

were very efficient. They were very punctual; they started work the same time every morning and finished the same time every evening. They cleaned up after them. They were very polite and no bother having them around working on the house

How does your house look after the External Insulation had been completed

It looks fantastic. I have received numerous of compliments from my neighbours on my road. Even people I don't even know have approached me and telling me how well my house looked.

Did you receive a Guarantee

Yes I did. I received a 10 year guarantee.

Would you recommend Absolute Acrylics

Yes definitely and I would highly recommend Absolute Acrylics. The overall standard of the workmanship was excellent.

The colder it is outside, the warmer it is inside

Semi Detached Homes

Dublin Gas Heating and Plumbing

We have a philosophy that you can never have enough knowledge. So we attend courses throughout Ireland and the UK to keep us ahead of our competitors. This is why we have such a good reputation and have actually grown our business during the recession.

What grants are available?

Grants of €700 is available for Heating Control upgrade.

All applicants must carry out a Building Energy Rating (BER) on completion of works. *A BER grant is only payable once as part of a works grant.

Flushing your Radiators for higher efficiency

Power flushing is an effective measure to clean out the sludge that accumulates in your central heating system including, pipework, radiators and your boiler.

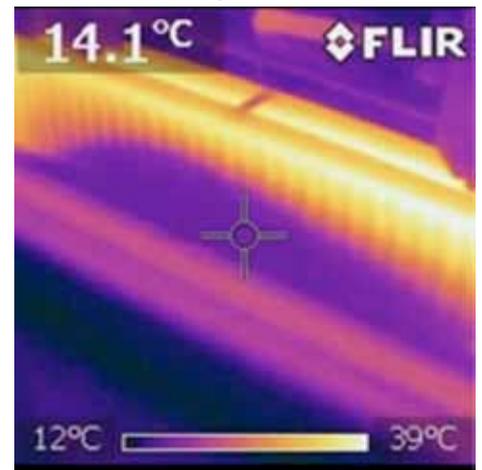

Your System is able to work with minimal effort after the flush is completed. After Power Flushing, your central heating system will function as well as a new system and will be up to 40% more efficient – no more cold radiators or noisy boilers!

A flushed system meaning radiators heat quicker, rooms get warm a lot faster without the need to turn your heating on to maximum, all resulting in less energy being consumed which will be reflected with big savings on your energy bills.

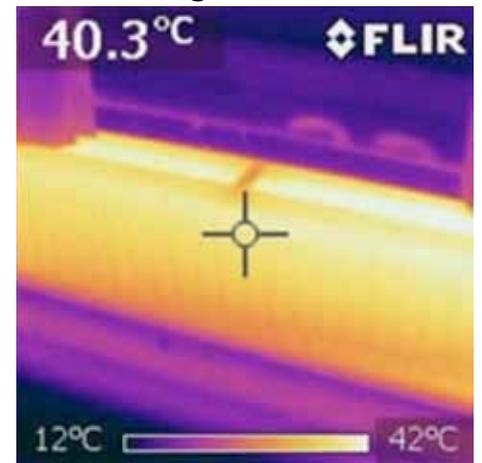

Using a heat detection camera we identify the inefficiency of each radiator before a flushing, and see the heat efficiency improvements after the flushing

Before Flushing 14.1°

After Flushing 40.3°

Gas & Oil High Efficiency Boiler Installation

Upgrading your heating system to an A-Rated system is highly recommended to ensure you gain the best level of efficiency for your home.

A new boiler can save you over 30% on your heating bills as well as improve the warmth and comfort of your home. A rated condensing boilers have an efficiency that start from 93% and above.

Your standard efficiency non condensing boiler could be running as low as 60%. We recommend replacing your boiler if is 10 years old or more

Heating controls and zoning of system

By separating your hot water and radiators we can drastically reduce your energy bills. This allows you to turn on your space heating (radiators) and your hot water independently and at times that suit you. For Example – during the summer you may not need your radiators on, so with our modern controls this will allow you to heat your hot water cylinder only, eliminating the need to use your expensive immersion.

Where possible we can install a completely separate zone for the bedroom areas and by using thermostats on the radiators it will give you fine control over each room, increase your comfort levels and in turn saving you further costs on your energy bills

Replication work in Mount Merrion

This semi-detached house in Mount Merrion was built in the 1930's. The whole estate was built with unique features and designer plasterwork.

While externally insulating this house and several others in the area Absolute Acrylics was able to replicate the designer plasterwork. We modernised the window sills with powdercoated aluminium but used a terracotta red to replicated the original tile windowsills.

The insulation used here was 100mm Grey EPS with a U Value of 0.27.

Our customer and their neighbours were very pleased with the outcome.

Important Changes to the Better Energy Homes Programme

The Minister for Communications, Climate Action and Environment (DCCAE), Denis Naughten T.D. is announcing a shift in the Government funded energy efficiency schemes, representing a major step in the transition towards decarbonising our heating and the Energy White Paper’s vision of a low carbon energy future.

In this regard, we would like to inform you for a number of key changes to the Better Energy Homes grant programme, which will come into effect in 2022.

External Wall Insulation Grant Increase

The grant levels for External Wall Insulation will increase from February 2022, with grant levels ranging from €2,750 to €6,000.

New improved grant levels under Better Energy Homes from February 22022

	Current	New
External Wall Insulation Detached	€6,000	€8,000
Semi-detached or end of terrace	€4,500	€6,000
Mid terrace or apartment	€2,750	€3,500

Absolute Acrylics and your SEAI Grant Application

Absolute Acrylic will apply for the grant on your behalf. We will then deduct the grant amount from your gross total. You simply pay the balance and we will claim the grant back from the SEAI.

In order for Absolute Acrylics to do this we must comply to all SEAI regulations. We must insulate the complete house, all the walls to the U value of 0.27 or less.

If there is a new build extension that is fully insulated to SEAI standard, we are allowed to exclude this from the installation and still qualify for the SEAI grant. Please note, we would need to verify.

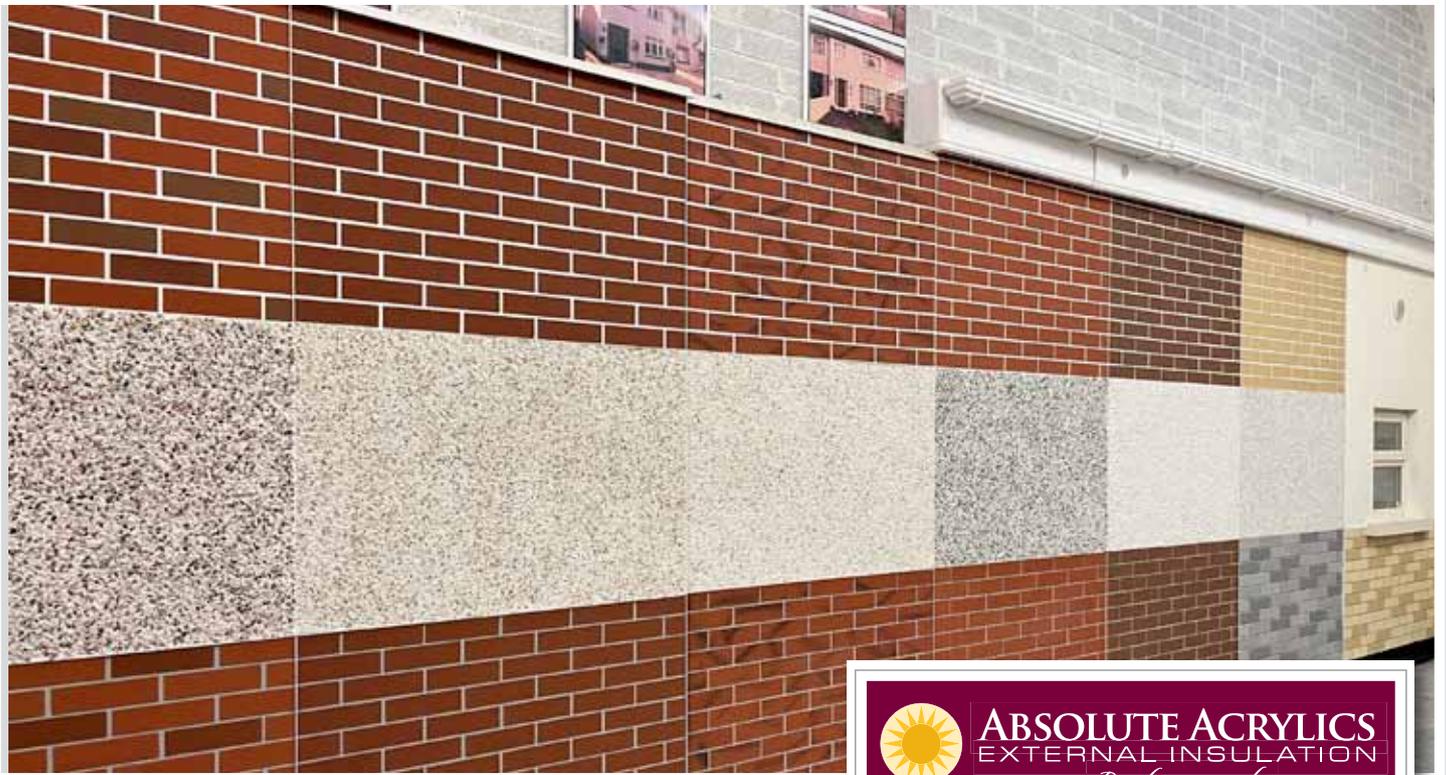

We normally do this from the drawings, opening up a socket or looking into a vent cover using a bore scope camera.

Please note your attic must also be insulated to qualify for the external insulation grant. We must also install the correct ventilation to SEAI standard.

If you have overhead services from the ESB, we will contact them to have them moved and refitted. We will also contact Bord Gais for moving and reinstating the Gas box.

We also remove and refit all down pipes, waste pipes, soil pipes, lights , alarm boxes and any other items that need addressing
