The real brick system are real genuine bricks used for all types of surfaces. These give the durability and beauty of solid bricks. They come in many styles and colours each with its own distinctive feature. They can be used on new build projects and also with external insulation. We have a full showroom available displaying each variation. Please call 01 848 3115 to make an appointment. (Appointment Only).

Please note that colours in the brochure are a close replication of the actual finish. Final selection is the responsibility of the customer and we recommend that you call to our showroom to finalise selection. Alternatively you may ask for a brick sample to take with you.
